

This issue is not dead..... We can still stop pelleting.

This Monday, January 27th is now a very big day for our collective efforts. In addition to getting your intervention submitted to CNSC, we have one week to directly sway City Hall.

Immediate actions you can take this week:

1) SIGN-UP TO SPEAK TO COUNCIL -- Deadline 11am Jan 27th.

We need as many people as possible to speak at city council this Monday — January 27th - 6:00 pm (same day as your intervention is due.) Dean Pappas has asked for supporters to come and get involved.

Sign-up with this form -- deadline is 11am day of meeting.

<https://forms.peterborough.ca/Clerks-Office/Request-for-Delegation>

The form asks for: (Question —> Answer).

Type of Meeting —> City Council.

Date of Meeting —> January 27th

Agenda Item —> BWXT licence application

You will then be asked for name, address etc, click box at bottom and submit.

2) COME TO THE CITY COUNCIL MEETING — January 27th @ 6:00 pm.

We need to pack the house, overflow the building and make sure council sees as many faces as possible standing up against pelleting by BWXT. If you are not comfortable speaking, come celebrate your completed CNSC intervention FILLING Peterborough City Hall chambers.

3) CALL YOUR COUNCILLOR -- IMMEDIATELY

Call the Mayor and your councillor and tell them you want them to stop pelleting in Peterborough and vote in favour of the Dean Pappas' motion.

Call **Mayor Diane Therrien** 705-742-7777 ext. 1870

Tell her she has to stand up for the people of Peterborough.

Call **Lesley Parnell** 705-742-7777 ext. 4641

Tell her your concerns about your children's health are valid.

Call **Keith Riel** 705-742-7777 ext. 4640

Remind him that the 1.3Billion dollar clean up in Port Hope was a mess created with the approval of the regulator. Peterborough deserves a better future, as a City Councillor, he can help ensure it happens.

Call **Henry Clarke** 705-742-7777 ext. 4611

We already have health studies showing that cancer rates in Peterborough city and county are well above provincial rates. Our collective health has already been compromised by the toxic material left behind by GE. Pelleting by BWXT will increase the toxic burden. We don't need yet another Health Study. We need action from our elected representatives to protect us from more carcinogens being dumped on us by uncaring corporations.

Call **Don Vassiliadis** 705-742-7777 ext. 4645

Call **Kim Zippel** 705-742-7777 ext. 4615

Call **Stephen Wright** 705-742-7777 ext. 4612

Call **Gary Baldwin** 705-742-7777 ext. 4647

Call **Andrew Beamer** 705-742-7777 ext. 4642

Councillors Supporting CARN and standing up against pelleting.

Call **Kemi Akapo** 705-724-7777 ext. 4614

Thank her for supporting the motion and tell you want her to continue.

Call **Dean Pappas** 705-742-7777 ext. 4613

Thank him for putting the motion forward.
